

This document serves as the authoritative **User Manual & Access Control Specification** for the Srijan Youth Festival Management System. It outlines architectural hierarchy, module permissions, page access privileges, and data creation/editing rules for all user roles across the platform.

1. Role & Hierarchy Architecture

The system enforces a strict 6-tier role ranking model (`ROLE\_RANK`) designed to segregate administrative capabilities, program execution, volunteer mentorship, and mentee participation.

RANK	ROLE IDENTIFIER	USER TITLE	CORE RESPONSIBILITIES & SCOPE
4.0	ADMIN	Super Administrator	Full platform control. Manages system configurations, global guest pools, all programs, outreach tasks, and user promotions across all ranks.
3.5	PROGRAM_MANAGER	Program Manager	Oversees designated festival programs. Manages session schedules, coordinates volunteers, reviews mentee follow-ups, and analyses program metrics.
3.0	VOLUNTEER	Volunteer / Mentor	Frontline mentor. Records daily session attendance, manages mentee groups, conducts outreach follow-up calls, and submits progress remarks.
2.0	PARTICIPANT	Participant / Mentee	Registered festival attendee. Views enrolled program sessions, personal profile, and individual attendance records.
1.0	GUEST	Guest User	Newly onboarded registrant awaiting administrative verification. Restricted strictly to profile viewing until verified.
0.0	outreach	Outreach Contact	External student/contact pool entry used for follow-up coordination and call logging.

2. Page & Route Access Matrix (Who Can Access What)

Route access is enforced at edge runtime by Next.js Middleware (`middleware.ts`) and validated on the backend API layer. Users attempting to access unauthorized routes are automatically redirected to their allowed landing pages.

APPLICATION SECTION / ROUTE	ADMIN	PROGRAM MGR	VOLUNTEER	PARTICIPANT	GUEST / ARCHIVED
Public Pages (/ , /about)	✓ Yes	✓ Yes	✓ Yes	✓ Yes	✓ Yes
User Profile (/profile)	✓ Yes	✓ Yes	✓ Yes	✓ Yes	✓ Yes
Main Dashboard (/dashboard)	✓ Yes	✓ Yes	✓ Yes	✓ Yes	✗ Redirected
Programs & Sessions (/programs)	✓ Yes	✓ Yes	✓ Yes	✓ Enrolled	✗ No Access
Outreach & Follow-ups (/outreach)	✓ Yes	✓ Yes	✓ Assigned	✗ No Access	✗ No Access
Notifications Center (/notifications)	✓ Yes	✓ Yes	✓ Yes	✗ No Access	✗ No Access
Guest Management (/guests)	✓ Only Admin	✗ No Access	✗ No Access	✗ No Access	✗ No Access
Admin Panel (/admin)	✓ Only Admin	✗ No Access	✗ No Access	✗ No Access	✗ No Access

Account Archival Policy: If a user account is marked as `isArchived: true` or deleted by an Admin or Program Manager, all access permissions are revoked immediately regardless of previous rank. Archived users are restricted exclusively to viewing their static profile page.

3. Data Editing & Creation Matrix (Who Can Edit What)

The system applies granular permissions on entity creation, modification, deletion, and role transitions to prevent unauthorized privilege escalation.

ACTION / ENTITY MODIFICATION	ADMIN	PROGRAM MGR	VOLUNTEER	PARTICIPANT / GUEST
Create New Programs	✓ Full Rights	✗ No	✗ No	✗ No
Create Program Sessions	✓ Full Rights	✓ Full Rights	✗ No	✗ No
Create / Onboard Volunteers	✓ Full Rights	✓ Program Scope	✗ Request Only	✗ No
Create / Register Participants	✓ Full Rights	✓ Full Rights	✓ Full Rights	✗ No
Log / Update Attendance	✓ All Sessions	✓ Program Scope	✓ Assigned Mentees	✗ View Only
Log Follow-up Remarks & Calls	✓ All Contacts	✓ Program Scope	✓ Assigned Pool	✗ No
Verify / Promote Guests	✓ Full Rights	✗ No	✗ No	✗ No
Archive / Delete User Accounts	✓ Full Rights	✓ Full Rights	✗ No	✗ No

4. Role Transition & Promotion Safeguards

To preserve organizational security, role promotions managed via `/api/roles/change` enforce three inviolable authorization rules:

- Subordinate Rank Restriction:** An actor cannot modify the role of any user whose current rank is equal to or higher than their own (`targetRank >= actorRank`). For example, a Program Manager cannot edit another Program Manager or an Admin.
- Guest Verification Monopoly:** Newly registered users in the guest tier can only be verified and assigned operational roles by an **Admin**.

3. **Volunteer Promotion Cap:** Volunteers cannot promote participants to Volunteer or Admin status; such requests must pass through administrative review workflows.

5. Key Operational Workflows

A. Program & Session Setup Workflow

1. **Admin** creates a Program specifying age criteria, description, and associated temple.
2. **Program Manager** accesses the program and creates specific time-slotted Sessions.
3. Participants and Volunteers enroll or get assigned to the program.

B. Daily Attendance & Mentorship Workflow

1. During festival sessions, **Volunteers** open the session attendance roster on their mobile devices.
2. Volunteers mark presence (`Present`, `Absent`, `Excused`) for their assigned mentees.
3. Attendance instantly reflects on the mentee's profile and updates global analytics on the Program Manager dashboard.
